

OBSERVATION FORM

When did you install the drip irrigation system?

How many drops of water flow in 30 seconds?

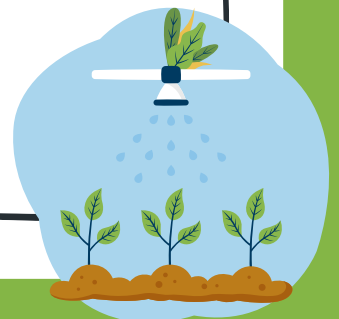

First Sprouting Day:

Does the water reach the soil surface slowly and evenly?

Was there any wasted water during the observation period?

Did the drip irrigation system provide savings?

What would happen if this system were used in all fields?

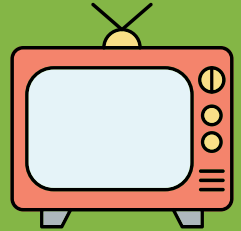

BE THRIFTY!

Use an energy-saving light bulb!

Turn off the switches of electrical appliances!

Do not waste water while washing your hands and brushing your teeth!!

Do not buy foods you do not need from the market.

Take only as much food as you need on your plate when eating!

Do not open the refrigerator door unnecessarily!

Mark the saving activities you have done!
