

CURIOUS BOX

Today at school, with our “My Clock Tick-Tock” activity, we explored the concept of time and learned the importance of reading and showing the time. While experiencing the excitement of assembling our own clocks, we learned how to read and show full, half, and quarter hours.

At home, you can support your child by following the “Plan Your Day” activity page. By hanging the clock they made anywhere you like, you can help them track time more consciously.

Stay curious and keep exploring science!

TICK-TOCK MY CLOCK
