

# What happens when the wind blows?

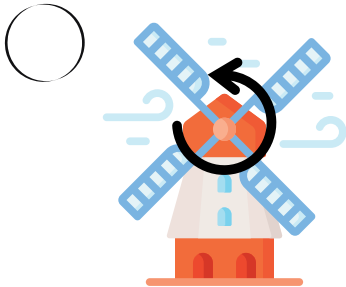

Today we felt the wind and learned what we can do with it!

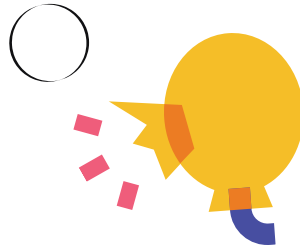

It makes the kite fly.

It blows the leaves away.

It spins the mill's blades.

It pops the balloon.

What can the wind do? Mark it!

# Draw the Wind Machine of Your Dreams!

 The wind is a very powerful friend!  
We can't see the wind, but when it blows, it moves everything.  
The pinwheel spins with it, the windmill makes flour.  
It can even produce electricity thanks to the wind.  
How amazing, right?
